

Production Manager -Oncology Injections

As the Plant Manager for an Oncology Injections Manufacturing Plant, you will assume a pivotal role in overseeing and driving the production of critical oncology medications. Reporting to the Plant Head and collaborating extensively with cross-functional teams, you will be responsible for the end-to-end management of manufacturing processes, ensuring compliance, quality, and efficient operations. Your leadership will contribute to the organization's commitment to delivering life-saving pharmaceutical products.

Responsibilities

- Plant Manager will be reporting to Plant Head and he/she will coordinate with other departments on regular basis.
- Plant Manager will be responsible for overall production activities of small volume oncology formulation (liquid and lyophilized), manufacturing planning and execution, man power planning and control, documentation, audit compliance etc and other relevant activities.

Qualifications

- Candidate must be B. Pharma or M. Pharma
- Candidate must have minimum 12-15 years of manufacturing experience. Out of which 8-10 years manufacturing of oncology injection (Liquid as well Lyophilized) is mandatory.
- Candidate must have relevant experience in WHO-GMP or PICs or EU certified plants and should have experience in handling GMP audits from international regulatory authorities.
- Candidate with managerial experience will be preferred.

Join us in our journey to make a meaningful difference in the lives of individuals fighting Cancer. Your expertise and leadership will play a crucial role in our pursuit of excellence in pharmaceutical manufacturing.
